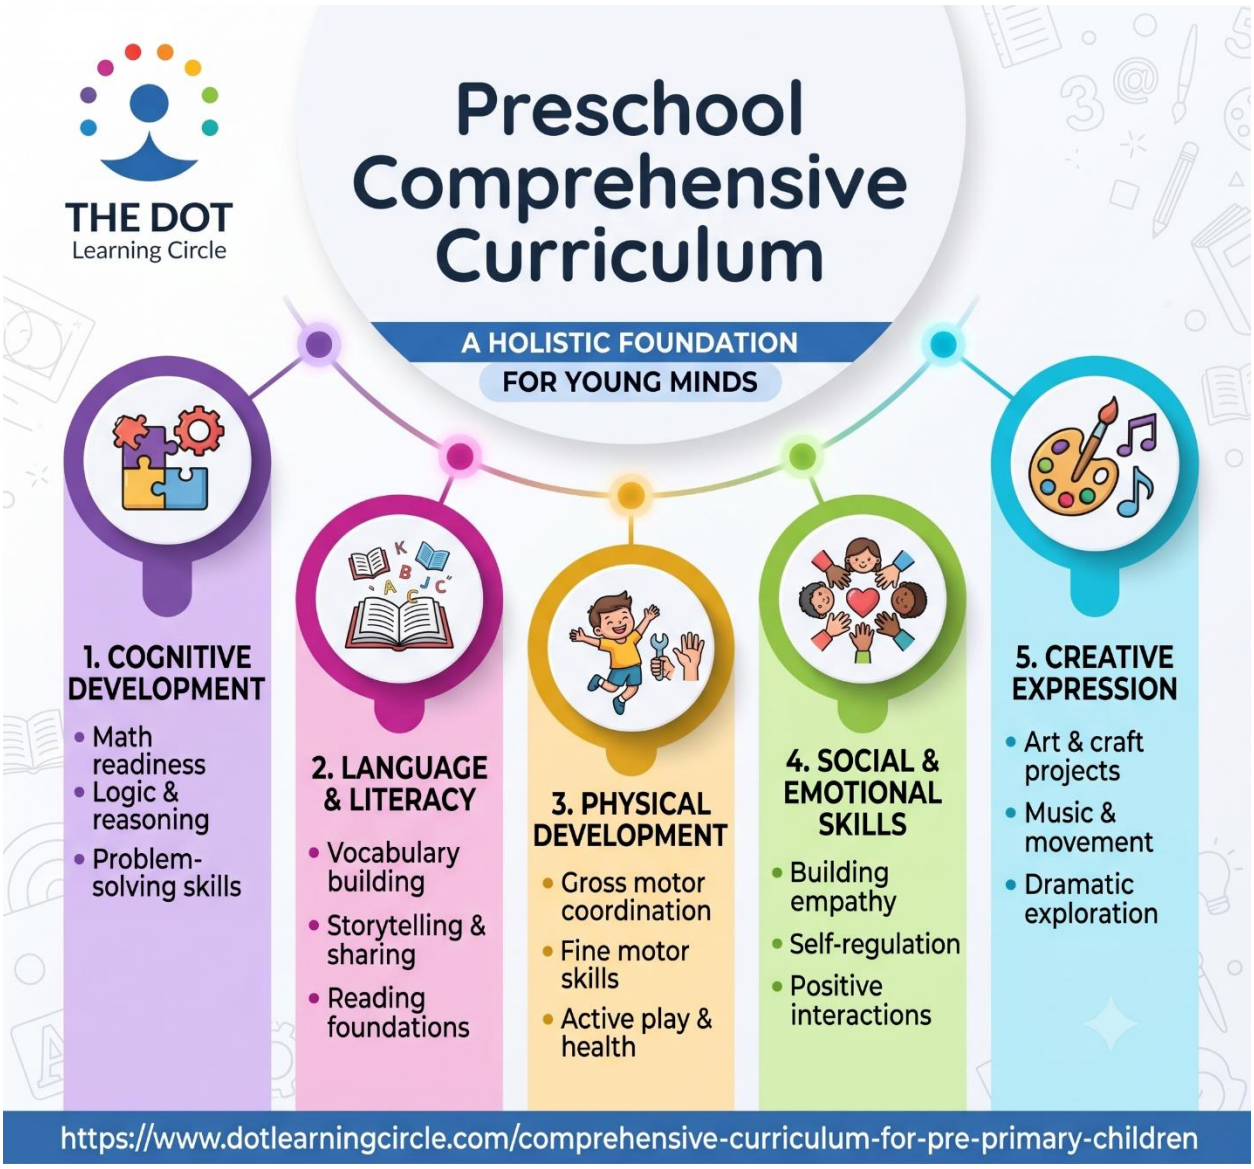
Preschool Comprehensive Curriculum for Future-Ready Kindergarten Learning

Building a strong foundation during the early years is one of the most important investments a preschool can make. The Dot Learning Circle offers a preschool comprehensive curriculum that combines joyful learning, research-based teaching strategies, and developmentally appropriate practices to help every child thrive. Designed specifically as a curriculum for pre-primary children, the program nurtures curiosity, creativity, confidence, and essential life skills while preparing children for lifelong learning.

Aligned with the NCF pre-primary curriculum guidelines and NEP 2020 for kindergarten, The Dot Learning Circle provides a structured yet flexible learning framework that supports the holistic development of every child. Instead of focusing only on academics, the curriculum integrates cognitive, physical, language, social, emotional, and creative development through engaging, theme-based experiences. The program is built around eight interconnected learning areas that help children develop foundational skills naturally and meaningfully.

The curriculum of pre-primary education is carefully sequenced to match children's developmental milestones. Every weekly theme connects learning across language, literacy, numeracy, art, movement, health, social-emotional learning, and environmental awareness, making kindergarten learning enjoyable, interactive, and purposeful. Children actively participate in stories, games, hands-on activities, discussions, music, creative projects, and play-based exploration that encourage independent thinking and problem-solving.

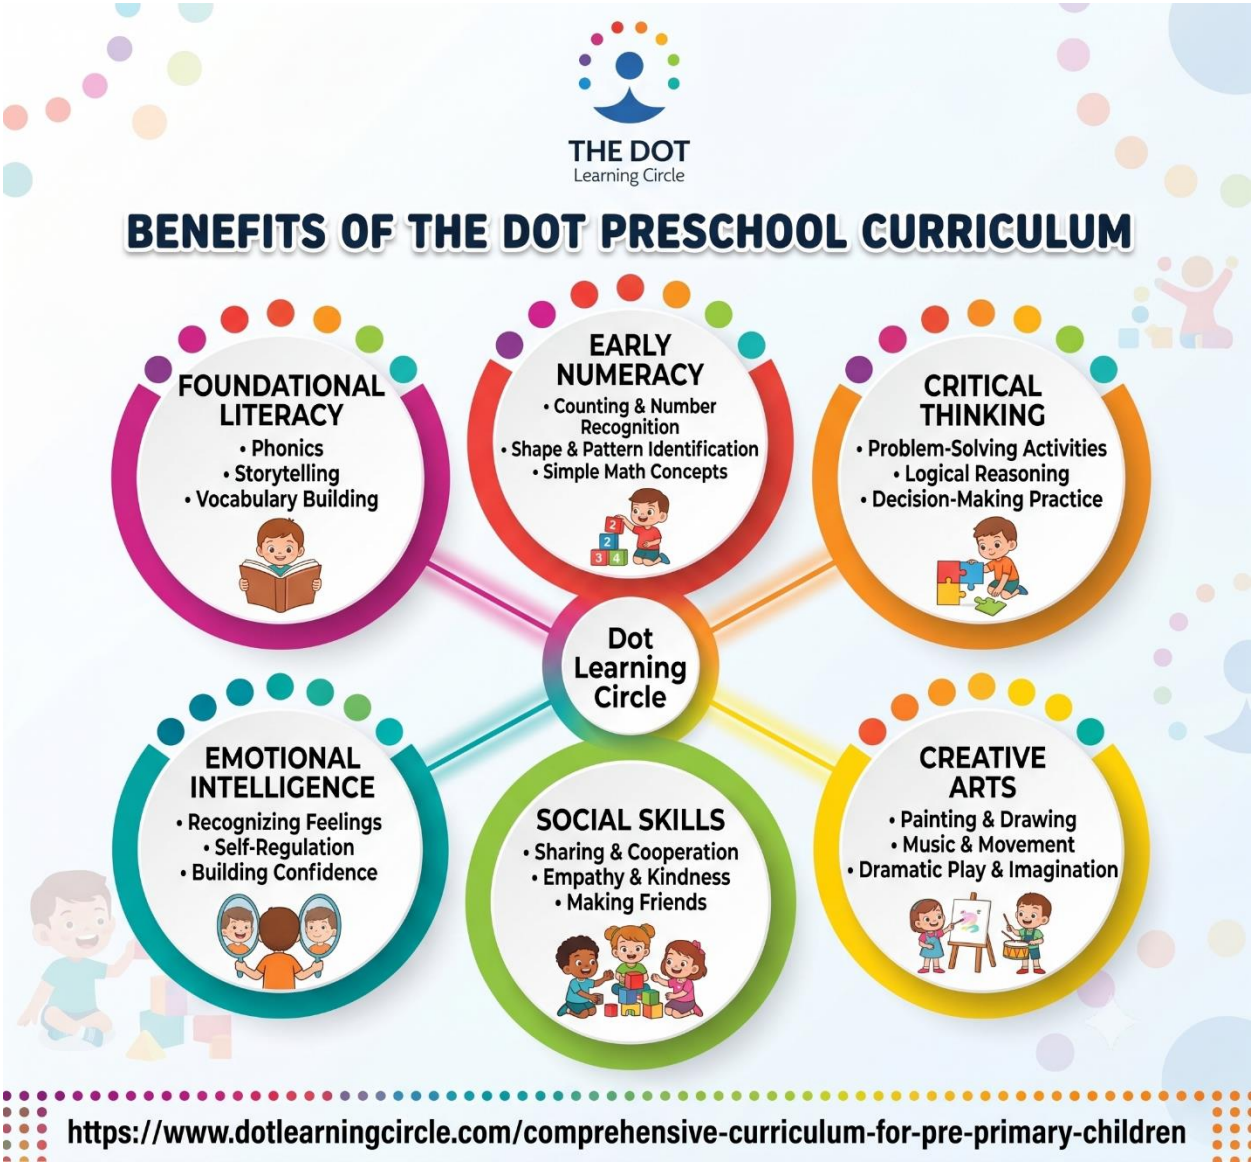


Whether your preschool offers an LKG curriculum or UKG curriculum, The Dot Learning Circle provides age-appropriate lesson plans, learning resources, teacher guidance, and assessment tools that ensure consistency across classrooms while supporting individual learning needs.

The Dot Curriculum Benefits for Preschools:

- Comprehensive, integrated curriculum aligned with NEP 2020 for kindergarten
- Fully supports the goals of the NCF pre-primary curriculum

- Research-based approach inspired by child development and neuroscience



- Theme-based learning that keeps children engaged throughout the year
- Balanced focus on academic readiness and holistic development
- Strong foundation in literacy, numeracy, communication, and social skills
- Encourages creativity, critical thinking, collaboration, and curiosity
- Developmentally appropriate activities for LKG and UKG learners
- Built-in child progress tracking and developmental assessment

- Meaningful parent communication and progress reporting
- Complete teacher support through structured lesson plans and classroom resources
- Flexible implementation suitable for different preschool environments

The Dot Program Highlights:

- Eight integrated learning areas covering every aspect of early childhood development
- Weekly thematic learning that connects concepts across multiple subjects
- Play-based, activity-driven classroom experiences
- Purposeful learning through storytelling, music, movement, experiments, and creative exploration
- Daily engagement plans that simplify classroom implementation
- Continuous observation and assessment to identify learning gaps early
- Professional support and training for teachers
- Parent engagement resources that extend learning beyond the classroom
- Child-centred methodology that encourages confidence, independence, and joyful participation
- Seamless progression from LKG curriculum to UKG curriculum, ensuring continuity in learning and school readiness

The Dot Learning Circle understands that successful kindergarten learning goes beyond worksheets and memorisation. Children learn best when they feel safe, valued, curious, and excited to explore the world around them. That is why the curriculum combines purposeful play, experiential learning, and structured guidance to create meaningful learning experiences that children genuinely enjoy. The integrated approach also helps preschools maintain high-quality educational standards while meeting the evolving expectations of parents and educational frameworks.

For preschool leaders seeking a future-ready preschool comprehensive curriculum, The Dot Learning Circle offers a complete solution that strengthens classroom teaching, empowers educators, supports families, and nurtures confident young learners. By aligning with the NCF pre primary curriculum and NEP 2020 for kindergarten, this thoughtfully designed curriculum for pre-primary children equips schools with everything

needed to deliver meaningful early childhood education and build a strong foundation for lifelong success.
